## KEVIN D. STAMEY

Kevin D. Stamey, a member of the Senior Executive Service, is the Executive Director, Air Force Sustainment Center, Air Force Materiel Command, Tinker Air Force Base, Oklahoma. He is responsible for assisting the commander in providing operational planning and execution of Air Force Supply Chain Management and Depot Maintenance missions for a wide range of aircraft, engines, missiles and component items in support of AFMC missions. He assists in overseeing operations which span three air logistics complexes, three air base wings, two supply chain management wings and multiple remote locations that incorporate more than 40,000 military and civilian personnel. In addition, he helps ensure installation support to more than 75,000 personnel working in 140 associate units at Tinker, Hill and Robins Air Force Bases.

Mr. Stamey has 30 years of experience in government service and he began his career in 1988 as an aerospace engineer at Tinker AFB. He has served in a broad range of senior leader positions in acquisition, sustainment and maintenance organizations. He served as Director of Engineering for the Air Force Program Executive Officer for Intelligence, Surveillance and Reconnaissance, where he provided technical oversight for 69 programs and projects including six Acquisition Category I programs. Mr. Stamey has also served as the Chief of the Headquarters Air Force Materiel Command Systems Engineering Division and as Chief Engineer for the Cruise Missile Product Group for systems such as the Advanced Cruise Missile and the Conventional Air Launched Cruise Missile. Mr. Stamey's assignments also included serving as the Chief Engineer for the E-3 System Sustainment Manager and as a project engineer for several systems including the B-2, B-52 and other special projects.
